

HTML

HyperText Markup Language

A standard language for
creating and structuring
web pages.

HTML

HyperText Markup Language

```
<!DOCTYPE html>
<head>
  <heed>
    <nete cherset="VRT-dy
    <billd>
    <hets nam=="vinwavro
    <bink net="Stylenter
  <body>
    <hue
      <n href="linco hus
    <y>
    <u hreet="VRlscedy
```

Structure

Web Pages

Content

Boilerplate Code

`<!DOCTYPE html>` `<— specifies the document type —>`

`<html>` `<— root element —>`

`<meta charset="UTF-8">`

`<head>` `<— contains metadata —>`

`</body>` `<— contains content —>`

`<body>`

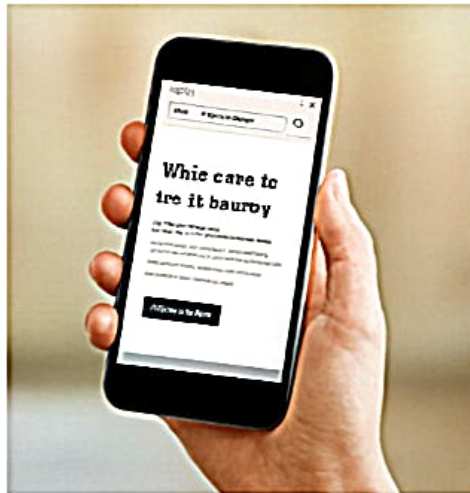

`</html>` `<— root element —>`
