Troyen box OS & Kali Linux.

→ Provides best in class
experience of PenTesting
& SecTesting in real
world environment.

→ Also for Vulnerability
Assessment & Mitigation,
Computer forensics &
Anonymous browsing.

Kali Linux vs ParrotOS

Sample User
Interface

Heavyweight
equivalent laggy

all basic tools
for hacking

even more simple

doesn't lag

all tools linux has
its own tools

Kali Linux

① Needs more ram about 16GB

② Graphic card need for graphic accelerated

③ 20GB of free space

④ Gnome desktop Interface

⑤ No pre installed compilers

Parrot OS

3200MB ram.

No need

16GB

about to meet desktop env.

Yes
